

My Story About Special Clothes

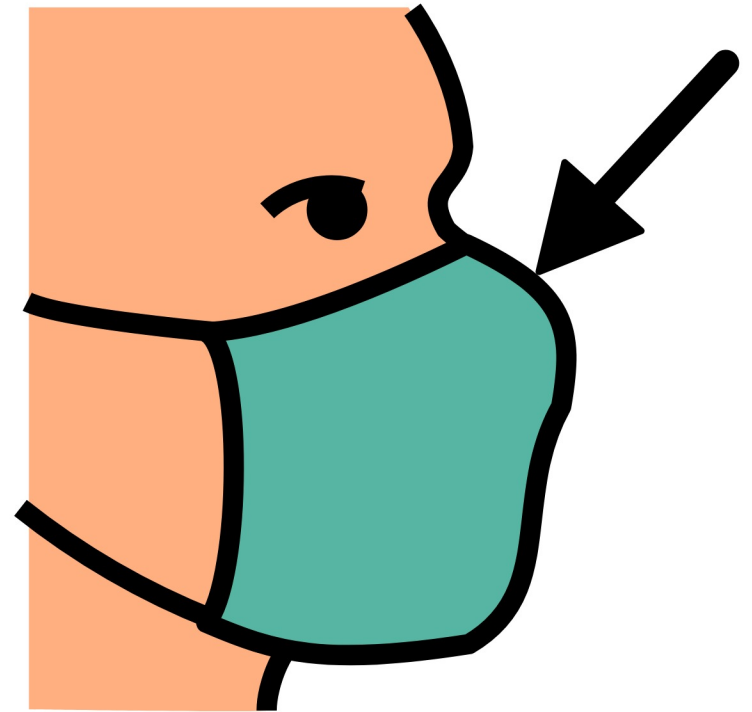

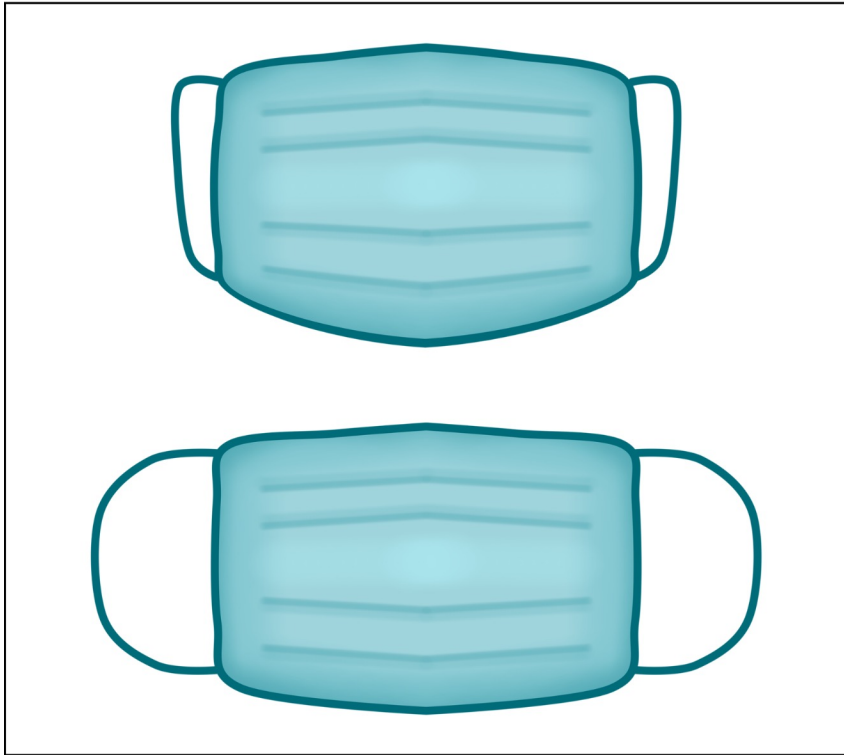

This story was created for students at Malkara Specialist School using PCS symbols and images from Pixabay.

I am staying at home with my family.
Sometimes, support workers might come to my house to help me and my family.

The support workers might be wearing special clothes. These special clothes help keep everyone clean and healthy.

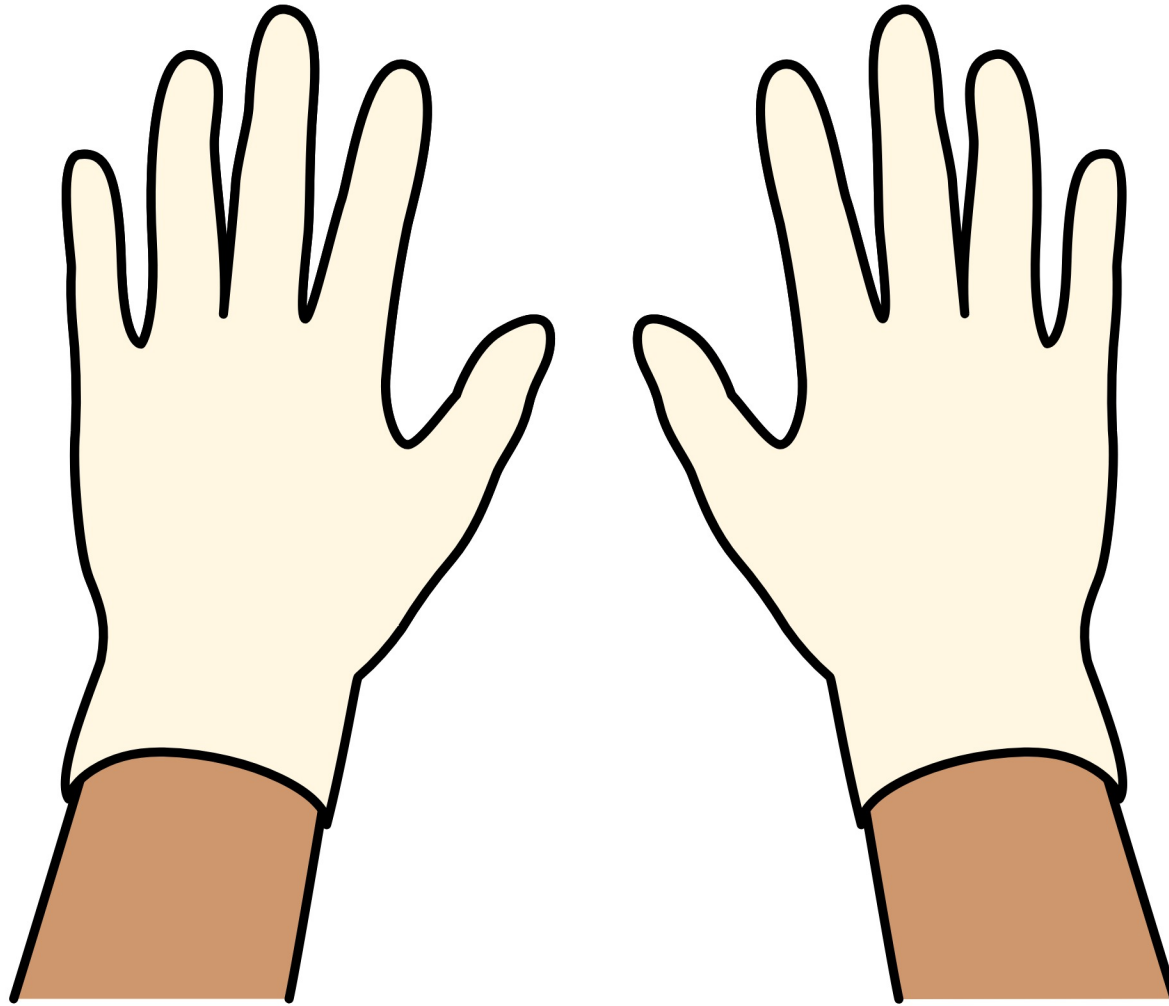

The support worker will be wearing a mask. The mask will cover their nose and mouth. This helps to keep their nose and mouth clean.

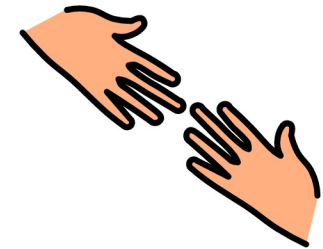

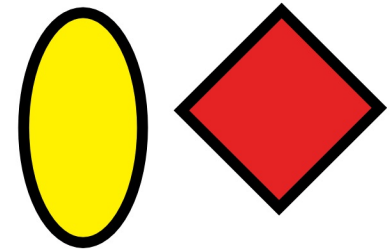

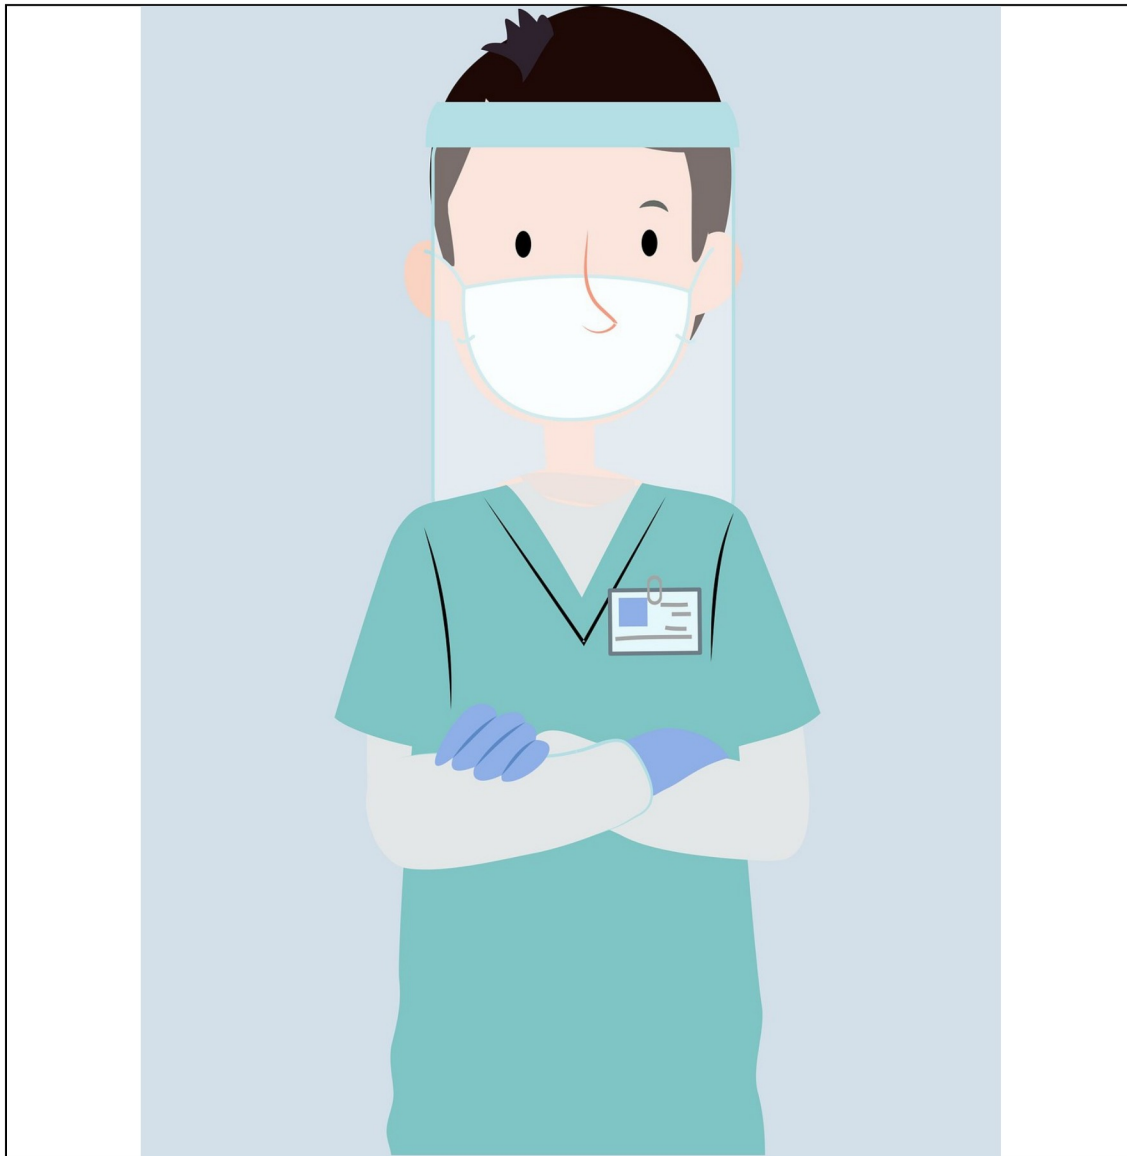

The support worker might be wearing a face shield. A face shield is a special visor with plastic that covers their face. A face shield helps to keep their face clean.

The support worker might be wearing a special gown over their clothes. This gown helps to keep their clothes clean.

The support worker might be wearing gloves. Gloves help to keep their hands clean.

My support worker might look different with their special clothes on. My support worker can still help me. Special clothes are OK.
